DETAILED ACTION

Applicants' arguments, filed 2/25/04, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

PRIOR ART

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 53, 55, 56, 67, 71, and 79-81 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tice et al. (P/N 6,024,983).

This rejection is reiterated and maintained from the previous office action, mailed 8/25/03. Applicants argue that the biological state of a cell is determined as a manifestation via the state of a collection of cellular constituents and that the instant invention determines the effects of perturbations via response profiles via

Art Unit: 1631

the activity of cellular constituents. Thus the state of a cell is determined via such biological response profiles of cellular constituents. It is noted that there is no instant limitation that limits these profiles to "different" cellular constituents. Thus the assaying of a cellular constituent as pointed to previously in the office action, mailed 8/25/03, reasonably is included as a plurality of constituents which are assayed in the reference. That is, the reference does not assay single constituent molecules but a plurality as performed in such standard assays as cited in column 13 of Tice et al. Applicants have not pointed to any instant claim limitation(s) which distinguish the instant claims regarding a simple response profile of TNP profiling with calibration and interpolation practice which are therein utilized for assaying cellular state changes due to perturbations determined by such TNP levels.

CLAIM OBJECTIONS

Claims 54, 57-59, 68, and 72 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be

Art Unit: 1631

calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
